

Five great reasons to get Virtuoso certified

Develop a better understanding of Nuage Networks cloud-based Software Defined Networking (SDN) connectivity solutions or establish yourself as a distinguished virtuoso with the Nuage Networks Virtuoso Certification Program (NN-VCP).

Beyond the excellent training you will receive working with the Nuage Networks Virtualized Services Platform (VSP), here are five great reasons to get a Virtuoso certification.

1. Professional recognition. Certifications set you apart from the crowd. They serve as a validation of your talent and make a strong statement about your ambition and desire to advance your career. Your credentials will let the customers, partners, and organizational peers you work with recognize they are being supported by a highly trained, industry-certified professional.

2. Career opportunity. Whether it's with your current organization or with a potential outside opportunity, employers are looking for top-qualified employees. Highlighting your certification credentials on your resume will help you stand out in the crowd and increase your chances of landing the job and maximizing your income.

3. Progressive learning. The program offers five certifications ranging from basic fundamentals to advanced implementation. This provides the opportunity and flexibility to develop your knowledge and career path based on your personal needs and goals.

4. Industry focus. The program is designed for professionals working in various SDN industries including datacenter, enterprise, service provider, and web-scale service provider. So regardless of the industry and network environment you work in, you'll be well positioned to support your organization and customers.

5. Specialization. The program includes certifications and dedicated courses focused in the areas of engineering and implementation, installation, operations, and integration. This is ideal for individuals requiring specialized knowledge and skills to support job-specific roles in any or all of these key practice areas.

Take your job and career to the next level with a Nuage Networks Virtuoso certification. The training is excellent and the benefits are significant and rewarding.
